## **DETAILED ACTION**

### ***Response to Amendment***

This office action is in response to election to restriction submitted November 13, 2006.

Applicant elected group I (claims 1-31).

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-31 are rejected under 35 U.S.C. 103(a) as being unpatentable over powerbuyerservice.com and further in view of Joao (US 20010037205 A1).

Regarding claims 1, 12-14, 22, 25, 26, 27 and 30, Powerbuyerservice teaches receiving initial information about a customer for the first part (referral source); identifying second party (service provider) to which to provide the information; providing the second party with the information; receiving updates information regarding said customer (see page 26, also applicant's background page 1). Powerbuyerservice does not teach determining compensation owned by said second party based on at least in part on said updated information and receiving the compensation. Joao teaches the Merchant computer can transmit any and/or all transaction data and/or information such as commissions and/or referral fees due, and/or commissions and/or referral fees paid to, the Content Providers who or which utilize the apparatus of the present invention ([0002], [009]-[0014], [0022], [0073]). It would have been obvious to one of ordinary

Art Unit: 3622

skill in the art at the time of the invention to implement Joao's referral and commission tracking system so that the referral service provider of Powerbuyerservice can be paid for the service of referring customers, as taught by Joao (see [0073]).

Regarding claim 2, powerbuyerservice teaches allowing the first party to provide initial information via a web site ... (see page 1-8).

Regarding claim 3, powerbuyerservice teaches allowing the first part to select the second party allowing the first part to identify a service needed (see page 1-8 and applicant's background page 1).

Regarding claims 4-9 and 16-21, powerbuyerservice teaches determining a service associated with the characteristic of the user; identifying a party that can provide a service... (see applicant's background).

Regarding claims 10-11 and 15, 23, 24, 28, 29, 31, powerbuyerservice does not explicitly teach the second party providing the updated information via a web site ...charging fee to the second part per transaction between the customer and second part, it is taught in Joao (see fig. 3, [0109]-[0111], [0114]-[0117]). It would have been obvious to one of ordinary skill in the art at the time of the invention to provide the updated information via the web site, as in Joao, since the transaction is performed online or using the website and also to charge fee per transaction based on the agreement between the referring site and the service provide, as taught in Joao (see [0115]-[0117]).

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Petras et al. (US 6,965,870 B1) teaches alerting a telemarketing agent of the activity of potential customer browsing a public server.

Prohaska et al. (US 20020023030 A1), teaches a third party compensation method that provides for the affiliation of a plurality of member attorneys with a benefit provider.

Bezos et al. (US 6029141 A) teaches Internet-based customer referral system.
